   - **Chart 30.** Real Value of the U.S. Dollar

7. Current Analysis
   - **Chart 31.** Global Current Account Balances
   - **Chart 32.** Bond Spreads for Select Euro Area Economies
   - **Chart 33.** Select Economies’ Banking Exposure to Peripheral Euro-Area Sovereign Debt
   - **Chart 34.** Sovereign Debt Repayment Schedule for Select Euro-Area Economies
Indicators of Real Activity

Globalization Institute
Federal Reserve Bank of Dallas
Chart 1. Global GDP Growth

NOTE: The advanced economies (ex. U.S.) aggregate includes the Euro Area, Japan, the U.K., Canada, Australia, South Korea, Switzerland and Sweden. The emerging economies aggregate includes China, Brazil, Russia, India, Mexico, Indonesia, Turkey, Argentina, South Africa and Colombia. The world aggregate includes these countries, which make up approximately 80 percent of world GDP computed using purchasing power parity (PPP)-adjusted GDP weights.

Sources: National Statistical Offices, International Monetary Fund; Haver Analytics
Chart 2. OECD Industrial Production

Index, 2005 = 100

Last Observation: Jan = 113.2

NOTE: Countries included in the industrial production index are all members of the Organization for Economic Cooperation and Development, or OECD (Australia, Austria, Belgium, Canada, Chile, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Israel, Italy, Japan, South Korea, Luxembourg, Mexico, Netherlands, New Zealand, Norway, Poland, Portugal, Slovak Republic, Slovenia, Spain, Sweden, Switzerland, Turkey, United Kingdom and United States).

Sources: OECD; Haver Analytics

Globalization Institute
Federal Reserve Bank of Dallas
Chart 3. Global Purchasing Managers Index

NOTE: This index measures purchasing managers' perspectives of current business conditions. An index value greater than 50 indicates economic expansion from the previous month, while a value below 50 indicates contraction.

Sources: JPMorgan; Bloomberg
Chart 5. Unemployment in OECD Economies

Last Observation: Feb = 5.1

Sources: OECD; Haver Analytics
Chart 6. Volume of World Merchandise Trade

Index, 2000 = 100

NOTE: This series includes data from 23 industrialized and 60 emerging market economies and covers approximately 97 percent of total world trade. Trade volume is calculated as the arithmetic average of world export volumes and world import volumes.

Sources: Netherlands Bureau for Economic Policy Analysis; Haver Analytics

Monetary Policy
NOTES: The chart plots the federal funds rate for the U.S., the main refinancing operation rate for the Euro Area, the base rate for the U.K., the overnight target rate for Canada and the uncollateralized overnight call rate for Japan applied until April 3, 2013, before the main operating policy target changed to expanding the monetary base. On February 16, 2016, the Bank of Japan (BoJ) adopted negative interest rates applied to excess reserves that financial institutions hold at the BoJ. The Bank also introduced an interest rate target of around 0 percent for its 10-year government bond yields in September 2016.
NOTE: The Reserve Bank of India utilizes the repo rate to inject liquidity into the monetary system and the reverse repo rate to remove liquidity. On August 19, 2016, the Bank of Indonesia changed its policy rate from the BI rate to the 7-day reverse repo rate.
Chart 23b. Central Bank Policy Rates in Major Emerging Economies

**China**
- 1-Year Lending Rate (Nov 21 = 4.15)
- 1-Year Deposit Rate (May 06 = 1.50)

**South Africa**
- Average Repo Rate (May 06 = 4.25)
